

ADITYA JAIN

CYBERSECURITY ENGINEER | NETWORK SECURITY | SIEM/EDR | DFIR

Patna, India (On-site: NIC, MeitY) | 📞 +91 74005 88896 | ✉️ adityasec32@gmail.com

🌐 [linkedin.com/in/ajainx1](https://www.linkedin.com/in/ajainx1) | 🐙 github.com/ajainx1 | 🌐 adityasec32.systems

PROFESSIONAL SUMMARY

Cybersecurity Engineer with 4+ years of expertise architecting network security, leading SIEM/EDR operations, and executing VAPT for Critical National Infrastructure (CNI). Currently directing security operations and system administration for 750+ government endpoints under NIC/MeitY, driving CERT-In compliance automation, ISO 27001 alignment, and default-deny NGFW architectures. Proven track record in reducing audit times by 60%, achieving 99.9% EDR uptime, and serving as primary incident responder. MBA in Cybersecurity in progress; targeting CISSP and OSCP.

TECHNICAL SKILLS

Network Security & Firewalls: Palo Alto NGFW (Panorama, App-ID), Check Point NGFW, Fortinet FortiGate, Sophos, WiJungle, VPN/ZTNA (Cisco AnyConnect, Tailscale), Default-Deny Architecture, Network Segmentation, Wireshark/PCAP.

Offensive Security & VAPT: Web/Infrastructure VAPT, OWASP Top 10, **Burp Suite Pro**, **Metasploit**, Nmap, AD Exploitation (BloodHound, Kerberoasting, DCSync), Impacket, Mimikatz, Rubeus, Privilege Escalation, PoC Development.

SIEM, EDR & Threat Hunting: Wazuh, Splunk, Microsoft Sentinel, Blu Sapphire, SentinelOne, Kaspersky EDR, Trend Micro, Snort, MITRE ATT&CK, DFIR/RAM-Dump Analysis, Sysmon, AI/ML Anomaly Detection.

Automation & Scripting: Python, PowerShell, Bash, Git, KACE UEM/HCL BigFix, PXE-based OS deployment, Compliance Automation (120+ CERT-In/CDAC checks).

Compliance & SysAdmin: CERT-In, CDAC, NIST CSF, CIS, ISO 27001, Windows/Linux Server Admin, Active Directory (GPOs, RBAC), DNS/DHCP, Patch Management.

PROFESSIONAL EXPERIENCE

Security Administrator and Vulnerability Management Lead

Feb 2024 – Present

Ebix Technologies (Client: National Informatics Centre, MeitY - Govt. of India) | Patna, India

- **System Administration & Infrastructure:** Managed Windows/Linux server environments, Active Directory (GPOs, RBAC), DHCP/DNS, patching, and endpoint provisioning across 750+ government offices, ensuring 99.9% uptime and secure baseline configurations.
- **EDR/UEM Migration:** Led enterprise-wide SentinelOne to Kaspersky EDR and KACE to HCL BigFix migrations across 750+ nodes with zero business disruption; architected multi-vendor EDR stack achieving 99.9% uptime.
- **Network Security Hardening:** Enforced default-deny policy across Palo Alto, Check Point, Sophos, and WiJungle NGFWs; resolved critical VPN/WAN connectivity issues between NIC HQ and State Data Centre, improving availability by 40%.
- **SIEM Deployment & IR:** Deployed Wazuh and Splunk for centralized log aggregation; served as primary CERT-In responder performing RAM-dump analysis, IP-reputation triage, multi-district malware containment, and forensic evidence handling.
- **Vulnerability Management & VAPT:** Owned end-to-end vulnerability discovery, utilizing **Burp Suite Pro** and **Metasploit** for PoC validation; coordinated OWASP Top 10 remediation; hardened IIS via secure headers, XSS sanitization, and RBAC.
- **Compliance Automation:** Built PowerShell/Python automation validating 120+ CERT-In/CDAC checks across 750+ endpoints, reducing audit preparation time by 60% and ensuring 100% compliance adherence.
- **Unified NOC Monitoring:** Built in-house observability platform (UPS/power telemetry, WAN latency, portal availability) across 38 districts, producing SLA evidence for leadership and improving incident response time by 35%.
- **Security Mentorship & Leadership:** Designed and delivered comprehensive cybersecurity training on Check Point NGFW, SentinelOne EDR, and Wazuh SIEM to 60+ district-level NIC teams, significantly elevating regional incident response capabilities.

Self-Directed Offensive Security Training

Aug 2023 – Jan 2024

Independent Security Research | Remote

- Completed advanced Active Directory attack-path labs on Hack The Box and VulnLab (multi-forest environments) including Kerberoasting, DCSync, and Domain Controller compromise to build toward hands-on penetration testing certifications.

SOC Analyst – Threat Hunter

Dec 2022 – Jul 2023

RRG Engineering Tech (Client: Nuclear Fuel Complex, Dept. of Atomic Energy) | Kota, India

- **CNI SOC Operations:** Served as threat-hunting and incident-response SME in 24/7 Critical National Infrastructure SOC, monitoring enterprise telemetry via Blu Sapphire SIEM and Splunk.
- **Detection Engineering:** Tuned SIEM correlation rules and EDR policies, improving true-positive detection rates by 35% while reducing false-positive noise by 30%.
- **Malware Analysis:** Reproduced adversary exploits in sandbox; reverse-engineered TTPs via Kaspersky EDR; authored IOC/TTP reports and led host isolation and recovery procedures.

SOC Analyst – IDS and Signature Development

Jun 2022 – Oct 2022

E2E Networks | Vellore, India

- **Signature Development:** Authored and deployed custom Snort and Wazuh IDS signatures in 24/7 SOC, improving detection coverage against novel attack patterns by 25%.
- **Threat Intelligence Automation:** Automated AbuseIPDB feed ingestion for real-time IP blocklisting; analyzed network telemetry for routing anomalies and compromise indicators.

Technical Support Executive

Dec 2021 – May 2022

Teleperformance (Microsoft Enterprise Account) | Jaipur, India

- Delivered Tier-2 Microsoft enterprise support via Rave ticketing platform, maintaining 95% SLA compliance and contributing to internal knowledge base.

KEY SECURITY PROJECTS

- **State NOC Admin Portal (NIC Bihar):** HTML5, JavaScript, PHP, Ollama LLM. Live dashboard monitoring 38 district-level nodes with traceroute diagnostics, zero-trust secure authentication, outage alerting, and voice-enabled RAG chatbot for enhanced security operations.
- **Unified NOC Monitoring Suite (NIC Bihar):** JavaScript, CSS Grid, Fetch API. Real-time synthetic monitoring for WAN speed and portal availability across 38 districts, featuring severity-tiered alerting and automated SLA reporting.
- **LAN Asset Management Portal:** Python, DHCP/PXE, Bash. Locally hosted, secure portal for automated software distribution, PXE-based OS deployment, and encrypted internal file transfer, improving IT operational efficiency.
- **Live Portfolio & Source Code:** adityasec32.systems
- **Social Impact Tech Project:** cyberkarma.me – Full-stack AI trivia platform (Python, React, AI/ML) that donates meals and veterinary aid to rescue dogs for each correct answer, demonstrating full-lifecycle development and community engagement.

EDUCATION & CERTIFICATIONS

- **MBA in Cybersecurity** (Expected Jul 2027) – Chitkara University, Punjab, India
- **B.Tech, Computer Science and Engineering** (2019 – 2022) – Manipal University Jaipur, Rajasthan, India
- **Active & In Progress Certifications:** Fortinet FCA in Cybersecurity (Jan 2026) | EC-Council “In the Trenches: SOC” | RHCSA (2021) | BasisTech Autopsy DFIR | TryHackMe PT1 (In Progress, Expected Dec 2026) | WEB1 (Target 2027) | CISSP & OSCP (Target 2027+)
- **Foundation Training:** EC-Council CSU | STAR Ethical Hacking Expert | CompTIA IT Fundamentals, Network+, Security+, and A+ Training (IANT Delhi)

ADDITIONAL INFORMATION

- **Languages:** English (Professional Proficiency), Hindi (Native)
- **Notice Period:** 30 days (negotiable, subject to NIC/MeitY handover terms)
- **Relocation:** Open to Delhi NCR, Bengaluru, Chennai, Hyderabad, Pune, Mumbai, and Jaipur
- **Security Clearance:** Eligible for government projects and Critical National Infrastructure roles
